Footnotes:

1. Certification applies only to units with water as the process fluid.
2. No suffix is used on standard models with accessories and modifications that do not affect thermal capacity. Models with suffix “-F” are standard models with an alternate fill arrangement.
3. Suffix “-SL” added to model numbers above is used to indicate models with low sound fans and incur a capacity reduction of 5% compared to models with standard fans.
4. Suffix “Y” added to the model numbers above is used on non-standard models that are not CTI certified due to tower application or modifications.
