Footnotes:

1. Multiple cell configurations of the single cell models above are also available but not listed individually. Multi-cell configurations are end-wall to end-wall arrangements of the single cell designs which do not impact the air flow rate or capacity of the individual cells, and are included in the certification.
2. CTI certification of thermal performance currently applies only to units with water as the process fluid.
3. Certification includes access and maintenance options that do not affect thermal capacity.

Certified Model Number Examples:
