Footnotes:

1. Multiple cell configurations of the single cell models above are also available but not listed individually. Multi-cell configurations are end-wall to end-wall arrangements of the single cell designs which do not impact the air flow rate or capacity of the individual cells, and are included in the certification. See example model number below.
2. Certification includes access and maintenance options that do not affect thermal capacity.
3. The suffix "F" is affixed to the model numbers of units with an optional discharge "air valve" device that are not CTI Certified.
4. Sample model number: AC-200T x2  
Where: AC = The product series  
200T = Model Number  
"x2" = Two cell arrangement of the primary certified model (capacity equals 2 times rated capacity)
