Footnotes:

1. Multiple cell configurations of the single cell models above are also available but not listed individually. Multi-cell configurations are end-wall to end-wall arrangements of the single cell designs which do not impact the air flow rate or capacity of the individual cells, and are included in the certification.
2. Certification includes galvanized steel plate or stainless steel plate structure materials and PVC or glass fiber reinforced casing materials.
3. Certification includes optional items that do not affect thermal performance, for example, access ladder and handrails.
4. Sample model number: SRN-100L/SA-2
Where: SRN = The product series
100 = Model Number
L/SA = Low Noise Axial Fan Type
-2 = Number of Cells (total capacity 2 times rated capacity per cell)
